

Stefan Perovski

Software Engineering Student · Full-Stack Java / Spring Boot
stefan.perovski20@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFILE

Third year Software Engineering student at FINKI with hands on full stack experience in Java and Spring Boot. I have built and shipped several complete systems, including a student internship platform now in production at my university, working across database design, secure REST APIs, React frontends, and deployment. Testing and security are part of how I build, not something I add later. I am looking for an internship where I can contribute to a real production environment and learn from experienced engineers.

PROJECTS

MedTech — Healthcare administration platform with separate portals for doctors, patients, nurses, and administrators. I designed the data model, built the REST API with role based access control, and wrote a full JUnit test suite (39/39 passing). The CI/CD pipeline on GitHub Actions runs security scanning and staged deployments.

github.com/steff221/MedTech2.0

Spring Boot 3 · Spring Security (JWT) · PostgreSQL · React / Next.js 14 · TypeScript · Docker

FINKI Scheduler — Brings the faculty timetable and the consultations portal together in one app for FINKI students. Automated ingestion matches professor names across the two sources; students get a filterable weekly calendar with conflict detection, .ics export, and a campus room directory with an interactive map.

github.com/steff221/FINKISApp

Spring Boot 3 · JWT · PostgreSQL · React / Next.js 14 · TypeScript · Docker

WaterWatch — Built in 48 hours at the CASSINI Hackathon in Skopje (20 teams). Processes Copernicus Sentinel 2 satellite data to compute water quality indices for monitoring stations across North Macedonia, shown on an interactive map. github.com/steff221/WaterWatch | water-watch-2t91.vercel.app

Python / Flask · React · Leaflet · Vercel

LINKER — Internship and employment platform for students at Ss. Cyril and Methodius University, now in production and under active development. I led the build as Chair of the Digitalisation Committee and continue to maintain and extend it.

Spring Boot 3 · JWT · PostgreSQL · Angular · TypeScript · Docker

EXPERIENCE

Chair of the Digitalisation Committee · University Student Assembly, Ss. Cyril and Methodius University

Mar 2026 – Present · Skopje

Leading the digital transformation of student facing processes across the university. Built and shipped LINKER, a platform connecting students with internship and employment opportunities. Conceived and organised the LINKER Hackathon, a 48 hour event with 11 teams, coordinating participants, mentors, judges, and company sponsors.

EDUCATION

BSc Software Engineering & Information Systems · Faculty of Computer Science and Engineering (FINKI), Ss. Cyril and Methodius University

Oct 2023 – Present · Skopje

Third year. Relevant coursework: Software Testing, Databases, Algorithms & Data Structures, Object Oriented Programming, CI/CD & DevOps.

SKILLS

Core: Java · Spring Boot · Spring Security (JWT) · JUnit (Mockito) · REST APIs · PostgreSQL · SQL · React · Next.js · TypeScript · Node.js · Docker · Git / GitHub · TailwindCSS

Familiar: Angular · .NET · C# · HTML / CSS · Bootstrap · MySQL · Oracle SQL

Tools: GitHub Actions · Jira · Scrum · Microsoft Azure · Vercel

LANGUAGES

Macedonian (native) · English (C2) · Croatian (C2) · German (B2)
